MILANO

DROP HEAD COUPÉ

The MILANO is a 2 plus 2 in drop head coupé form and has reasonable accommodation in the rear seats for two adults. Performance is in line with the donor car giving 0—60 m.p.h. in 8.5 secs. and a top speed of 118 m.p.h. Fuel consumption of up to 30 m.p.g. can easily be obtained with moderate driving, but will increase to approximately 22 m.p.g. with hard driving.

OVERALL DIMENSIONS

Length	170"
Width	65 ³ / ₄ "
Height	50"
Weight	1050 kg.
Weight distribution with 6 galls. petrol	
Front 50%	Rear 50%

The suspension and steering is retained unchanged in form, geometry and mounting points, thus retaining the excellent handling characteristics of the donor vehicle. Slight modification is made to the gearchange linkage in order to make it more positive than the original and the instrument layout can be altered as per photograph. On the completed cars the hood is fully lined and provided with a cover for neatness when it is folded.

MILANO DROP HEAD COUPÉ

The kit to produce this car consists of the following:-

1. Complete jig welded pre-drilled chassis.
2. All body parts, including doors on an exchange basis
3. Hood frame.

The donor car will provide everything necessary to complete the car except,

1. Front lights (Fiat headlights, Mini-metro side/flashers proprietary driving lights, total cost new approx £56.00.
2. A windscreen wiper motor to operate the pop-up headlamps.
3. Hood materials.
4. Paint.

All sound deadening, carpets, and interior trim can be used from the donor car.

We can supply the car to any stage of completion and will be happy to quote for your requirements.

COMPLETED CARS.

Due to the fact that in common with all component cars, the MILANO does not have a type approval certificate, it cannot be legally supplied complete, but this can be treated in either of two ways;

1. The car would be completed and tested, and then have parts removed for later re-assembly by the purchaser. Which part or parts would depend on your local Vehicle Licensing Office, but might be the engine and/or gear box and drivetrain. These could be installed in a week end.
2. The purchaser can stay at our premises for 2-3 days and complete the car under our supervision.

In either case, M.O.T. would then have to be obtained, and we will of course guarantee this.

We will also guarantee the chassis and body structure, against defective workmanship or design, for a period of two years, where the purchaser supplies the donor vehicle, and guarantee all mechanical parts for one year where we supply the donor vehicle.
