Sportiness at its heart.

There's something uniquely thrilling about convertible sports cars. The rush of freedom, the open road, wind streaming through your hair. The Alfa Romeo Spider goes one step further. Its style is reminiscent of the legendary Giulietta Spider with the unmistakable classic rear styling. The pure Italian sleek design is inspired by Giugiaro and Pininfarina. It has a sporting soul that instinctively responds to road and driver, a distinctive quality for which Alfa Romeo is known and loved all over the world. To experience the sensations for yourself, jump in; open the hood and drive.

The styling of an Italian thoroughbred.

The exterior of the Spider is instantly recognisable with its powerful, distinguished lines. Internally, the passenger experience combines sport, comfort and Italian elegance. Style is an inherent feature of the Spider. Its sporting spirit is enhanced by a black interior which features a black dash, brushed aluminium trim inserts, a leather sport steering wheel, with red or black stitching, and sport seats. Technological features such as cruise control, dual zone climate control, steering wheel controls for the radio, CD and MP3 players and parking sensors make every trip a pleasure with the Spider. The multilayer fabric hood is fully automatic, bringing ease and flexibility to your journey. For further exclusivity, you can even specify upholstery in Frau® or luxurious Poltrona Frau® leather. These fabrics come in black, natural or red and boast a unique softness. The Alfa Romeo Spider caters for your senses in every way.

Style

Increased power, lower consumption.

In today's world the desire for greater performance must be balanced against the need to reduce fuel consumption and exhaust emissions. Alfa Romeo has therefore developed two new engines that already conform to Euro 5 standards.

The first is the 1750 TBi Turbo Petrol 200 bhp engine. This power unit delivers an amazing 320 Nm of torque at only 1400 rpm, giving fantastic acceleration and a superbly smooth drive without you having to "work" the gearbox.

The 2.0 JTDM 170 bhp diesel engine, with its advanced turbocharger and high torque levels, shares the same sporting performance whilst also dramatically reducing fuel consumption.

Evolved performance

Power, innovation, reliability.

All the engines that Alfa Romeo has chosen for the Spider deliver superb performance to satisfy the most demanding of drivers. In addition to the new Euro 5 engines, you can specify a 3.2 JTS V6 260 bhp engine with optional Q4 four wheel drive, and the choice of Q-Tronic automatic transmission. The 3.2 JTS V6 incorporates Alfa Romeo's exclusive Twin Phaser variable valve timing system that delivers amazing torque even at low engine speeds. Diesel lovers can go for the 2.4 JTDM with particulate filter fitted as standard. This Alfa Romeo MultiJet engine provides the perfect combination of power and reliability. The 2.4 JTDM is available in two versions, the 210 bhp, coupled with a manual 6-speed gearbox and the 200 bhp version with a Q-Tronic automatic transmission.

Engines

Trust the car's instincts.

The Spider's sporting prowess can be identified down to its core: the instinctual handling allows for optimum control, giving you the confidence to enjoy the driving experience to the full. Impeccable road holding is guaranteed by an advanced suspension with a raised double wishbone configuration at the front and multilink at the rear. This intelligent engineering solution offers excellent handling without compromising safety and stability in any way. To optimise handling, Alfa Romeo's Electronic Q2 system uses the VDC control unit to create an effect similar to that of a limited slip differential, but using the car's braking system instead. Electronic Q2 combines the benefits of front wheel drive and four wheel drive to improve road holding, traction and stability.

Sporting character

Technical excellence.

For the ultimate sporty driving experience choose the 3.2 JTS V6 Q4 engine, the Spider with Q4 permanent four wheel drive technology. The heart of this system is the Twindiff central differential, an evolution of the Torsen C, that ensures permanent dynamic distribution of engine torque to all four wheels to match driving conditions.

If it's driving comfort you seek, Alfa Romeo has the solution for you. Choose Q-Tronic automatic 6-speed transmission for optimum comfort in a Spider, which can be specified with either the 3.2 JTS V6 Q4 260 bhp or the 2.4 JTDM engine. On top of offering power and uncompromising reliability, Q-Tronic also lets you choose between three driving modes: the basic Comfort mode for a more relaxed drive, Sport for maximum performance and Winter for safety over wet and slippery surfaces.

Driving pleasure

Every Alfa Romeo has your safety as priority.

The Alfa Romeo Spider is a two-seater thoroughbred packed with the most advanced safety systems. The body shell is designed to absorb impact to maximum effect. The passenger compartment boasts five airbags as standard equipment to protect you: two dual stage front airbags, two side airbags plus a special knee airbag.

The Spider also uses the latest electronic control systems to ensure maximum active safety: ABS with EBD, VDC, ASR, MSR (to avoid loss of grip during rapid gear changes on slippery surfaces) and Hill Holder (for easy starting on slopes).

Safety

State of the art.

The Spider comes equipped with with Blue&Me™, the hands-free system with voice recognition based on Windows Mobile® technology. You can use your own voice or the function keys on the steering wheel to operate your mobile phone over a Bluetooth® connection or to listen to music from a media player or pen drive.

If you feel happier when you receive clear directions to your destination, the Spider offers two solutions. Blue&Me™ Nav incorporates all the standard functions of Blue&Me™ plus a simple and user friendly pictographic sat-nav system. Alternatively, you can choose a map based sat-nav system with a 6.5" LCD display that also provides display and control functions for the radio, CD player and MP3 player, plus voice-controlled, hands-free, GSM mobile communications.

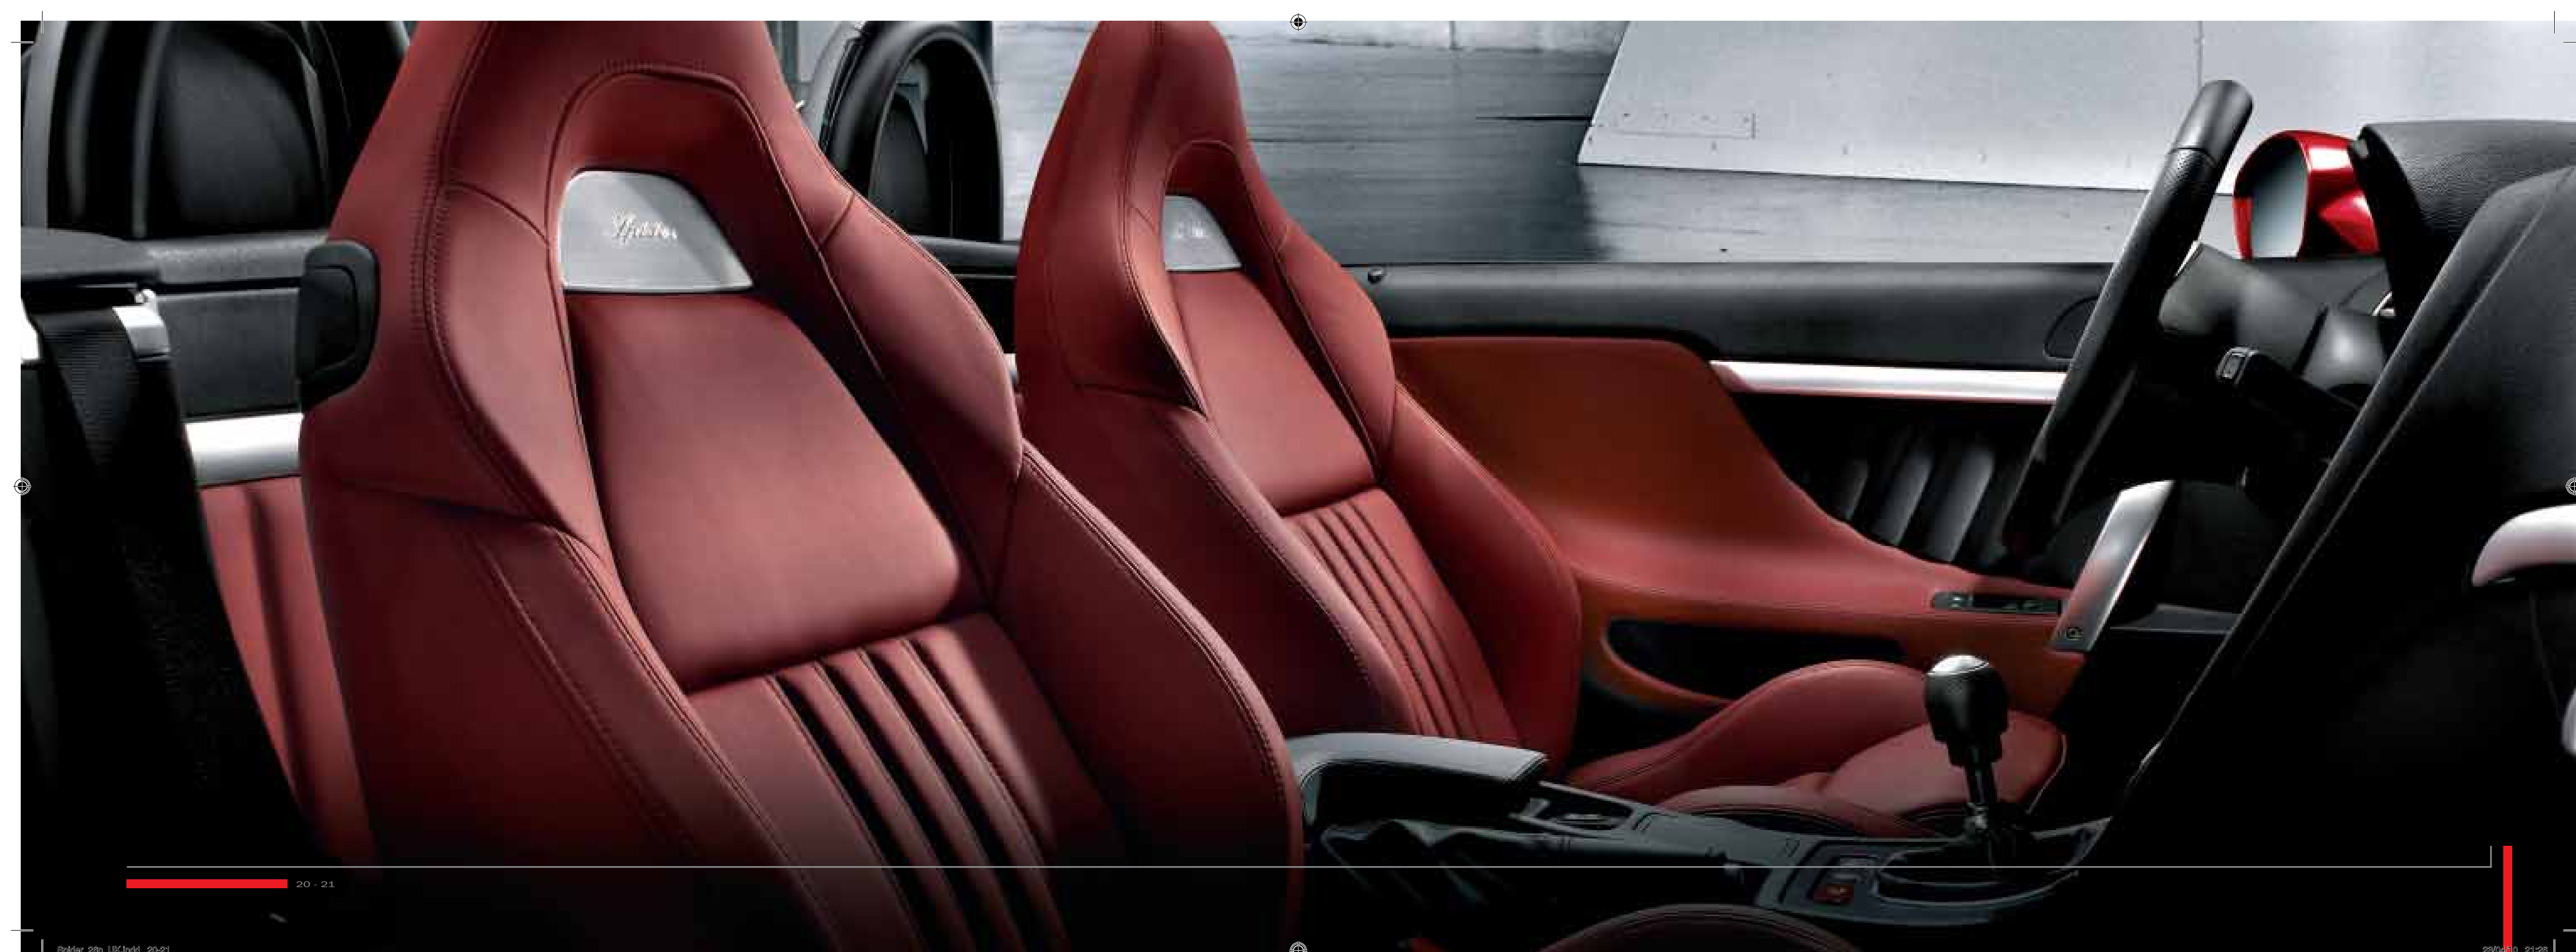

Multimedia

Sporting heritage.

The Spider has been the ultimate in sporting pedigree since it first launched in 1966.

This legendary car pays homage to the classic Alfa Romeo tradition whilst being fully equipped with the most coveted performance enhancing accessories. In addition to the superior engines, design and high tech devices, there are a variety of wheel options to choose from, including the 18" Turbine wheel which helps enhance the sporty feel of the car.
